Company Overview

Headquartered in Rochester, NY, Carestream is a worldwide provider of medical imaging systems; X-ray imaging systems for non-destructive testing; dental imaging systems; and precision contract coating services for a wide range of industrial, medical, dental, electronic and other applications—all backed by a global service and support network. With a broad product portfolio and more than 755 patents granted worldwide, Carestream enjoys a proud history of innovation in imaging.

Medical imaging: Healthcare providers around the world—from clinics and single hospitals to large networks—rely on Carestream’s 2D and 3D medical diagnostic imaging systems to help improve patient outcomes. The company’s imaging solutions are used in general radiography, intensive care, pediatrics, sports medicine, dental practices and veterinary hospitals. This customer-focused company is one of the top providers of digital radiography (DR) and computed radiography (CR) scalable solutions, working to meet the changing needs of healthcare providers and patients—right for today and ready for tomorrow.

NDT: Carestream serves global industrial markets with non-destructive testing products, enabling customers to capture high-quality images for critical inspection applications in aerospace, infrastructure and pipelines, castings and manufacturing.

Contract Manufacturing: Carestream partners with progressive companies to commercialize customer-focused products by applying precision roll-to-roll coating processes and large-scale manufacturing facilities for market opportunities that include energy storage, electronics, displays, automotive components and much more.

Rochester-based activities and accomplishments

Products manufactured in Rochester NY include the DRX-Revolution medical mobile X-ray system; the DRX-Evolution and DRX-Compass X-ray rooms; detectors for medical and NDT; screens and cassettes for medical and NDT; NDT computed radiography; dental intra-oral films, and a protective face shield.

Why Rochester?

Carestream's origins began with Eastman Kodak Company, a venerable part of Rochester's history. As Kodak grew its Health Imaging Division, the thriving product line diversified to include more complex imaging systems. In 2007, the product line spun off as Carestream Health and was acquired by Onex Corporation, a multimillion-dollar private equity firm respected worldwide for the technical advancements made in its family of companies.

Under the Onex umbrella, Carestream strengthened its leadership and workforce in the global marketplace. Throughout this worldwide expansion, Carestream's corporate headquarters has remained in its founding city of Rochester, New York.

In April 2021, Carestream announced the addition of about 70 new positions as part of an expansion in Eastman Business Park in Rochester.

Global impact and regional roots in Rochester give Carestream its strength. The city's long history of workforce talent and innovation have bolstered Carestream's past and present success and will continue to pave the way for its growth well into the future.
